AUTHORSHIP PRACTICES TO AVOID CONFLICTS

Every field of study experiences conflicts with determining authorship on published papers

Implementing the following suggestions may help avoid potential authorship disputes:

BE PREPARED
Establish written authorship agreements with all members of the lab and other collaborators before preparing a manuscript or before starting a project.

DOCUMENT CONTRIBUTIONS
Authors should list their substantial contributions to the design of the study; the acquisition, analysis, or interpretation of data; and the contribution to the writing of the final paper.

BE CONSISTENT
Have clearly written expectations for authorship on publications and follow them.

COMMUNICATE OFTEN
As the project progresses, the authorship agreement may need to be revisited.

APPROVE THE MANUSCRIPT
All authors should review manuscripts and approve the final version.

[1]This may include people who provide support such as: editorial assistance (e.g., proofreading), limited data collection, supervision of research tasks without contribution to the collection, analysis, or interpretation of data, or the writing of the publication, and technical support

ACKNOWLEDGEMENTS
Those who assisted[1] with a manuscript but did not provide substantial contributions can be given acknowledgement.
